# Introductory

---

The present volume constitutes the 1932 edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have been proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory, thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

THE DEPARTMENT OF MISCELLANEOUS INFORMATION is included in pages 9 to 56 and contains data concerning City, Provincial and Federal Government offices, commercial organizations, cemeteries, churches (denominational and miscellaneous), colleges and schools, hospitals, homes and asylums, building exchange and associations, institutes and societies, libraries, military organizations, public schools, secret societies, etc.

THE STREET AND AVENUE GUIDE is embraced in pages 57 to 102; in this feature the names of all streets and avenues are arranged numerically, giving the location, number of the street and showing the occupant.

The intersecting streets are shown in the order that they come.

THE ADVERTISING occupies pages 1 to 8; this section of the Directory, printed on colored paper, includes numerous advertisements of the leading manufacturing, business and professional interests. A casual perusal of these advertisements will picture many interesting phases of the city's activities. They are not display advertisements, primarily, however, but rather are reference advertising at its best. The need for this kind of information readily at hand is very great, and the general appreciation of this need is evidenced by the liberal patronage the City Directory enjoys in many and varied lines of trade.

THE ALPHABETICAL LISTS OF NAMES of citizens, business firms and corporations covers pages 103 to 294.

THE CLASSIFIED BUSINESS DIRECTORY occupies pages 295 to 343, and exhibits the various manufacturing, mercantile and professional names, compiled under headings appropriate to the class of industry of profession followed.

## ADVERTISING LETHBRIDGE

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements of Lethbridge, for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully, The Publishers

HENDERSON DIRECTORIES LIMITED.

July, 1932.

# Lethbridge, Alberta

---

Lethbridge, Alberta, is situated fifty miles north of the international boundary line, 764 miles west of Winnipeg. It is a prairie city on the banks of the Old Man River, just east of the Canadian Rockies, on the Crow's Nest Division of the Canadian Pacific Railway, and is the commercial and agricultural centre and supply point of Southern Alberta and the Crow's Nest Pass coal fields. It is the centre of large coal mining operations. The development of coal mining in this vicinity is the largest in Canada, west of Nova Scotia.

The value of co-operation between town and country is nowhere more appreciated than in Lethbridge. The citizens, through the Board of Trade, have ever been active in the interest of the farmer, and anything that would assist in improving farming conditions in any way has always been strongly supported by the Board. Irrigation development, better roads, more convenient railways, proper educational facilities for children in the country are some of the movements in which the people of the city have been identified. It is not from a spirit of altruism that the people of the city have taken part in these and various other movements in favor of their neighbors in the country. In this inter-relationship between town and country both the farmer and the citizens have benefited in many ways.

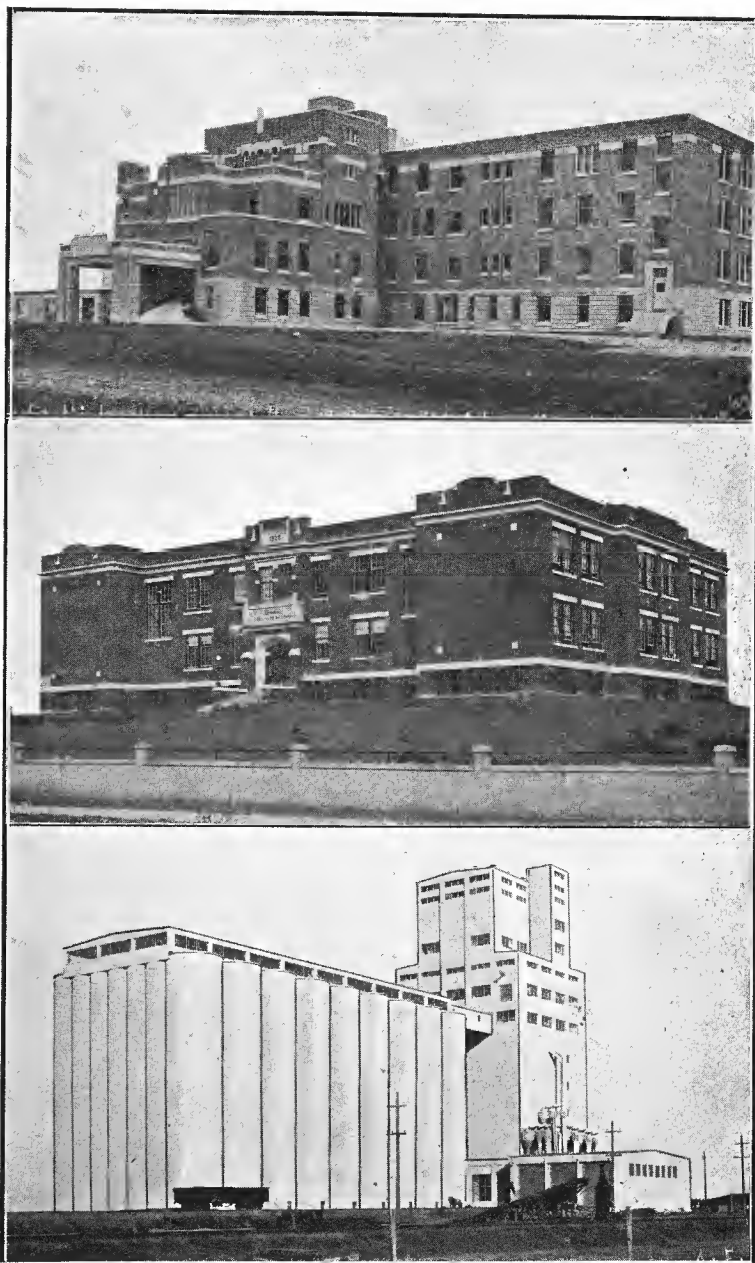

Lethbridge is spoken of by the travelling public as being the most beautiful of all the prairie cities. It is clean and sanitary. It has three well kept parks covering 303 acres, the admiration of all. As the traveller steps off the train, the first thing that greets his view is a park or garden, covering ten acres, or four blocks, in the centre of the city. By getting on the street car and travelling eastward he passes through wide streets bordered by rows of trees and boulevards on each side, until he reaches Henderson Park, which covers 200 acres and contains a beautiful artificial lake nearly a mile long, on which there is sailing, rowing and swimming in the summer, and skating in winter.

The street railways system, owned by the city, stretches over eleven miles, and there are two miles of paved roads.

The lighting system is by electricity supplied by a municipally owned power plant, which is one of the most up-to-date and economical in Western Canada, the fuel used being supplied by a municipally-owned mine within a stone's throw of the plant. This enables the city to sell electric current for lighting and industrial purposes at very attractive rates.

The telephone system embraces the latest models of automatic phones, and is owned and operated by the Alberta Government. The water supply comes from the Old Man River, which has its headwaters in the Canadian Rockies, and affords a never-failing supply of water. The water comes through an up-to-date filtration system, and is then forced up the banks of the river into large mains and distributed throughout the city. The waterworks are owned and operated by the city.

Public Buildings and Elevator

**Fifth Street South**

This city has a fine class of school buildings for the 2,900 pupils. The schools are all constructed of brick, with stone or cement foundations. They are equipped with all modern conveniences, and consist of eight public schools, four Roman Catholic separate schools, one manual training school, one kindergarten school and one high school. Pupils from the Lethbridge schools have demonstrated the efficiency of the tuition provided by taking premier place in the provincial competitions.

Several Churches, representing the various denominations, care for the spiritual needs of the people of Lethbridge. Many of the church buildings are quite imposing edifices that would be creditable to the people of a much larger and older city than Lethbridge. The Y. M. C. A. headquarters is a large up-to-date building, with club rooms, swimming pool, dormitories, etc.

The size and style of the public buildings, banks, and many of the office blocks indicates a faith in the future, shared alike by the governments of the Dominion and the Province, the financial concerns, the merchants and the public generally.

The discovery of natural gas has lately provided another valuable attraction for Lethbridge. The city is well piped, the pressure is strong, the quality good and the cost to consumers very low.

This city is situated in the centre of a vast agricultural and coal mining area, and affords ample opportunities for the investor in various lines, such as mining, agriculture, dairying, milling, clay products manufacture, manufacture of flax products, soap manufacturing and various other lines.

Lethbridge commands the eastern entrance to the Crow's Nest Pass through the Rocky Mountains. Between the city and the mountains, for some seventy-five miles, stretches a fertile plain, the western border of the great prairies. Across this plain the mountains are easily visible from Lethbridge. Eastward the same wonderful prairie stretches to Winnipeg, and southward to the international boundary. The agricultural products of this vast and fertile prairie require an outlet to the Western United States, British Columbia, and through

**Fifth Street South**

the Pacific Coast ports to the world's markets. The most important channel for this commerce is through Lethbridge and the Crow's Nest Pass.

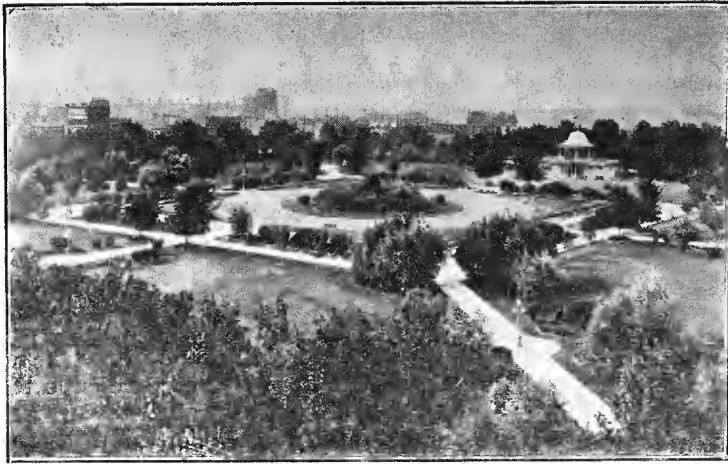

At Lethbridge, mills, elevators, factories, wholesale houses and stores required for the storage, manufacturing, marketing and shipping of this growing business are being provided as the traffic develops. The Canadian Pacific Railway completed its lines through the Crow's Nest Pass to Vancouver in 1916. This route from Winnipeg to Vancouver through Lethbridge and the Crow's Nest is shorter than the line through Calgary and the Kicking Horse Pass. The line through the Crow's Nest to the Kootenay and Columbia Valley country of British Columbia and via Kingsgate to the States of Washington, Oregon, and California now serves a large and growing traffic.

Fruit, produce, forest and mineral products from three localities, the imported merchandise intended for consumption by the rapidly increasing population of the great prairies are finding Lethbridge the logical gateway and the most convenient point for storage, assembling, assorting, marketing, and reshipping.

Lethbridge is likewise in command of a most important railway line to and from the United States via Coutts. The freer trade relations between Canada and the United States constantly promote the importance of this traffic. Lethbridge will also presently command the short line via Weyburn and Portal to and from Northwestern Canada and the Dakotas, Minnesota, and the Central United States.

### **AGRICULTURE**

In the annual report of the Board of Trade for 1930, it was stated that the year would go down in history as the period of the debacle in wheat prices. The year 1931 will be notable as the period of all-round lowest prices of agricultural products within the memory of most living men. Cash wheat prices broke at one point to less than 50 cents a bushel. Cattle, hogs and other livestock plumbed new depths. And whereas in 1928 that part of Southern Alberta represented by the Lethbridge railway division produced agricultural wealth of approximately \$65,000,000, in 1931 this fell to \$23,000,000.

**Galt Park**

Thus was the commodity price fall translated into an hitherto inconceivable falling off in the purchasing power of the most numerous element of our population.

In the light of events, perhaps the deflation in farm commodity values was to be expected. High prices for wheat during the years 1925 to 1929 coupled with world-wide acreage increase due to the war and stimulation of high prices had combined to stimulate production to a point where, in 1929, a surplus equal almost to a year's purchases by importing countries had been piled up. This abnormal carry-over, taken in conjunction with an abnormally large 1930 crop in Russia, set the stage for a price debacle which carried prices down to a figure far below the average world cost of production. Other farm commodities followed in close pursuit, bringing about an agricultural crisis in 1931 which has affected the whole fabric of trade and commerce.

Southern Alberta has come through the crisis in a fashion which has caused some comment. Nineteen thirty-one grain crops were sub-normal. Lethbridge railway division's estimated wheat production was 20,600,000 bushels as against actual shipments of some 35,000,000 bushels in 1930. Average per acre yields were about two-thirds the ten-year average, or close to 11 bushels, and coarse grain returns were in proportion. In Southwestern Alberta yields approached normal, or 16 bushels per acre. In the Southeastern area June and July drought took its toll and yields dropped to an average of 6 to 7 bushels, with some areas getting little more than seed and feed back. In no section, however, was there the total failure which characterized the year in some of the southern areas of the prairie provinces, with the result that farmers are facing the new year with the knowledge that they will be able to sow the new crop without being forced to borrow money to purchase seed and feed.

The 1931 crop was not a failure in South Alberta but was the smallest wheat crop harvested since prior to 1923, and the monetary returns were further lowered by the very low prices prevailing. Some measure of relief was afforded by the federal government five cent wheat bonus, but on the whole it must be admitted that 1931 did not repay the average farmer the cost of his operations, and

consequently he was not in a position to make payments on his loans, machinery notes or other debts. This did not apply in all cases as many farmers had provided good reserves in the eight years of comparative plenty which had preceded 1931.

One very definite result of low yields and low prices in 1931 was a complete check in the process of mechanization of wheat growing in the Lethbridge area. There was, in fact, some evidence of a return to horse-drawn machinery of cultivation and harvesting owing to the difficulty of financing purchases of oil and fuel for tractor operation. There was also some evidence of curtailment of wheat acreages, the 1931 wheat planting being estimated at 2,000,000 acres on the Lethbridge railway division as against the maximum of 2,200,000 acres the preceding year, a reduction of 10 per cent. There is nothing, however, to indicate that farmers generally are willing to take a backward step, and as conditions return to normal it may be expected that farm mechanization will be resumed, though in a somewhat more orderly manner than marked the rush into tractor-combine wheat farming in the years 1927-1929. Greatly lowered farm labor wages will, of course, have some effect on the kind of machinery the wheat farmer will employ in the immediate future, but the greater degree of timeliness in farm operations possible with tractorized machinery will always be an important point in deciding the methods to be used in the prairie wheat belt.

Nothing is surer than that farmers must continue to strive for low cost wheat production, and no doubt the experience of the next few years will point the way. There is every indication of a general move to curtail wheat acreages the world over, but nothing is surer than that the prairie belts of Alberta, Saskatchewan and Manitoba will for many years depend on wheat for the main cash return, and all efforts must be bent towards cheap production of wheat of a high standard of quality.

An important development of the year was a strong trend towards mixed farming, but the limitations imposed by scarcity of livestock water in some areas and the limited rainfall makes any general movement in this direction debatable. There is, however, a growing feeling among the farmers in favor of keeping enough livestock and poultry which, together with a good garden, will supply the farm table, and this movement, together with an increase in farm tree-planting, is making for greater stability and permanence in wheat farming in the prairie belt.

One other factor is important. All wheat growers in the Lethbridge area have seed and feed with which to seed their 1932 acreage. That means much in view of present financial conditions. On the other hand it has to be admitted that 1931 summerfallowing operations were not carried out so satisfactorily as for some years previously owing to lack of funds, making it difficult to get the operation done on time, and owing, also, to the dry weather which militated against good tilth.

### IRRIGATION

1931 was an unusually hot and dry year. The mean temperature exceeded the normal by about  $5\frac{1}{2}$  degrees, and the rainfall during the spring and summer, was, with the exception of two years—1918 and 1910—the lowest on record for the past thirty years. Notwithstanding these exceptional conditions, however, the crops in the irrigated districts were excellent.

The sugar beets, an exclusively irrigated crop, were particularly good, although the tonnage per acre was slightly lower than last year the sugar content was exceptionally high—18.25%.

#### LETHBRIDGE NORTHERN IRRIGATION DISTRICT— 100,000 ACRES

This is a co-operative project, owned by the farmers under it, but operated by the provincial government under the supervision of an official trustee appointed by the province.

The wheat crop was about normal this year—of good grade. There was considerable increase in coarse grains.

The beet crop was good with an average of about ten tons per acre, and a maximum of eighteen tons.

A potato association was formed with twenty-two members who had from five to forty acres of Netted Gem potatoes with an average yield of about five tons of good grade and good quality. Eighteen of these members have one or more acres of certified seed, which was inspected throughout the season. As a result the district has about fifty tons of certified potato seed.

The alfalfa acreage was increased by about three thousand acres, with about two hundred acres of new permanent pasture.

They had several plots of beans which did exceptionally well. All the beans ripened. Sweet clover used for reclamation purposes was increased and about fifty thousand pounds of number one seed was threshed for sale.

#### ALBERTA RAILWAY AND IRRIGATION COMPANY PROJECT—120,000 ACRES

This project is owned and operated by the Canadian Pacific Railway Company and has been in operation for thirty-one years.

There are about 1,000 water users.

Due undoubtedly to the low price the acreage in wheat cropped this year decreased about 4,000 acres from last year. Livestock however is on the increase, there being 35% more hogs and 25% more dairy cattle on the project this year.

The average value of all products of this project this year is \$18.42 per acre.

Within this project are included three co-operative irrigation districts which own and operate their own canals, the company furnishing water to them in bulk at their headgates. These are: The Raymond Irrigation District, 6,500 acres; the Magrath Irrigation District, 5,000 acres, and the Taber Irrigation District, 22,000 acres.

They are all well settled prosperous agricultural communities.

#### TABER IRRIGATION DISTRICT—22,000 ACRES

This project is located thirty miles east of Lethbridge and has been operated about eleven years.

The district is in excellent condition. The net bonded debt of this project is \$11.28 per acre and the annual assessment for all purposes is \$2.30 per acre.

There was nearly 4,000 acres cropped to sugar beets this year, yielding an average of 10.3 tons per acre, with a sugar content of 18.34%, giving an average return of about \$62.28 per acre.

A local creamery has been started this year and handled a maximum of about 1,500 pounds per week of cream.

## CANADA LAND AND IRRIGATION COMPANY, LIMITED 45,000 ACRES

The irrigation project of the Canada Land and Irrigation Company, Limited, is situated north-east of Lethbridge between the Old Man and Bow rivers.

The total area owned by this company is approximately 250,000 acres, of which 110,000 acres are irrigable. Adjoining the project is the New West Irrigation District, containing 4,500 acres of irrigable land, which is served with water from the company's system.

The irrigation system is developed at the present time to provide for the irrigation of 45,000 acres. The irrigable area served in 1931 was approximately 36,500 acres, of which 32,500 acres were irrigated, contained in about 315 farms.

Crop production in 1931 was fair, averaging 17.3 bushels and was seriously affected by hot winds in July and August. Prices for all farm produce and livestock were unfortunately low.

Approximately 190,000 acres of pasture lands are interspersed with and adjoining the project, which are leased for livestock operations.

## NEW WEST IRRIGATION DISTRICT—4,500 ACRES

This project is about eight years old, a co-operative enterprise owned and operated by the farmers under it. Wheat was the principal crop this year.

## UNITED IRRIGATION DISTRICT—36,000 ACRES

This is a co-operative project owned and operated by the farmers under it.

It is located about 20 miles west of Cardston and the same distance north of Waterton Lakes.

It is served by the C.P.R. extension of the Cardston branch which makes it directly tributary to Lethbridge.

## DAIRYING

According to preliminary figures just released by the Provincial Dairy Commissioner, Alberta reports a record volume of dairy production for 1931.

The preliminary estimate, subject to revision when final returns are received, shows that the total milk production was 15 per cent. greater than in 1930. The creamery butter production reached a total of 22,650,000 pounds, which exceeds the record of 22,330,000 pounds in 1924, and shows an increase of 28 per cent. over last year.

The total cheese production is estimated at one million pounds.

The number of creameries in operation was 92, and the number of cheese factories was eight.

Due to the drop in prices, however, the total value of the products is lower than that of last year. This year the total for all dairy products on Alberta farms is estimated to be \$15,750,000. Last year the total value was finally placed at \$18,675,000. The average price for creamery butter for the year just past was estimated at 20c, in comparison with 28.04c last year.

However, the production of dairy products in the area centering on Lethbridge increased 5.2 per cent during 1931, setting a record for this district. Heavy importations of dairy cattle have been recorded.

Official figures for the past 10 years in creamery butter production for Alberta are:

Year	Creameries	lbs. of butter	selling value	c per lb.
1920 .....	53	11,821,291	6,555,509	55.45
1921 .....	44	13,048,493	4,543,007	34.82
1922 .....	54	15,417,070	5,126,843	33.25
1923 .....	75	17,868,853	5,891,186	32.97
1924 .....	89	22,339,857	7,059,630	31.60
1925 .....	98	19,630,101	6,959,058	35.45
1926 .....	99	19,912,466	6,568,280	33.00
1927 .....	100	16,425,000	5,748,700	35.00
1928 .....	100	14,425,000	5,048,750	35.00
1929 .....	96	16,000,000	5,760,000	36.00

1931 .....	92	22,650,000	4,530,000	20.00

### MINING

In line with most industries the world over, the coal industry in the Lethbridge district has suffered severely during the past year, and on looking over our records of the past ten years we find we occupy a lower position, both as compared to the total domestic output of the province and tonnage produced, than at any time during that period, excepting the year 1924 when a serious strike interrupted the operations and even then with a 6 2-3 months strike, the tonnage produced far exceeded that of 1931 although our percentage in relation to the total domestic coal of the province was lower at that time. This, of course, is not without reasons, and when these reasons are considered we could scarcely expect much better results.

The following table will convey some idea of the coal industry of the province as a whole, and the position of the Lethbridge district in relation thereto, but owing to the unsatisfactory state of the coal market it has been deemed inadvisable to estimate the December output, and as the figures for December will not be released for some time yet, the figures given only show the 11 months output for last year

Year	Total		Lethbridge	
	Total	Domestic	Lethbridge	Per Cent.
	Alberta Coal Output, Tons	Coal Output of Alberta, Tons	District Output, Tons	Domestic Output
1922 .....	5,976,432	3,086,669	565,926	18.3
1923 .....	6,866,923	3,161,741	657,032	20.8
1924 .....	5,203,713	3,096,660	409,099	x13.2
1925 .....	5,883,394	3,156,359	669,119	21.2
1926 .....	6,508,908	3,160,020	658,882	20.8
1927 .....	6,936,780	3,357,171	695,139	20.8
1928 .....	7,334,179	3,378,200	795,855	23.6
1929 .....	7,147,250	3,385,749	731,149	21.6
1930 .....	5,641,337	2,802,470	542,415	19.2
1931xx .....	3,639,447	1,957,161	319,902	16.3

xOutput reduced during 1924 by a strike in the unionized fields lasting 6 2-3 months.

xx1931 shows only 11 month period.

Along with the general economic depression, and closely related thereto, the coal industry in this district has had to meet conditions of a more or less local nature, which have been responsible to a great extent for the drop in the percentage of the output as compared to the total domestic output of the province.

### **BUILDING STATISTICS**

During the year ending December 31, 1931, one hundred and fifty-five building permits were taken out, totalling \$1,294,056 as compared with two hundred and twenty-two for the year 1930, totalling \$984,830.

The main permit of the year, which tended to boost the 1931 total was for the superstructure of the Dominion government terminal storage elevator, amounting to \$1,000,000. The construction of this elevator employed a large number of men for approximately six months, thereby, reducing materially the numbers of unemployed in the city.

The next largest items in the list were for permits taken out by the city of Lethbridge covering the construction of concrete sidewalks, curbs and gutters, amounting to \$75,000 and for alterations and new foundations at power house \$48,404.

The first mentioned item was instituted as a work relief measure; assistance to the extent of 75% being procured from the Dominion and Provincial governments.

The latter was for boiler and turbine foundations required for the erection of the two new boilers and turbine installed in the municipal power plant together with the necessary alterations and improvements to existing buildings.

One apartment house was constructed at a cost of \$8,000 and permits were taken out for thirty-three modern residence and thirteen shacks amounting to in all \$95,340.

No permits for store or office buildings were issued in 1931, but an additional storage shed was commenced by the International Harvester Co. of Canada Ltd., at an estimated cost of \$5,000.

The other items making up the 1931 total were for small garages, sundry repairs and alterations to existing buildings.

### **BEET SUGAR INDUSTRY**

The year 1931 in Alberta has proved to be a good year for the sugar beet industry.

At the commencement, conditions were unfavorable as both the growers, and to a greater extent, the Sugar Company, had sustained heavy losses.

The season of 1930, while almost ideal from the standpoint of growing sugar beets in Alberta, gave disastrous results to the industry in general.

This was caused by the heavy blizzard and storm which swept Western Canada from October 13 to October 17. During this period of driving storm, the temperature fell as low as nine above zero. This froze all beets which were still unplowed to a distance of three to five inches in the ground, and damaged very severely beets awaiting delivery.

It proved impossible to store these damaged beets, either dug or undug, and from that time the factory was obliged to work—at a heavy loss—thousands of tons of beets, which had deteriorated badly both in sugar content and purity.

Under these conditions it was decided in 1931 to reduce the acreage accepted for contract. At the same time, to meet lower sugar prices and world conditions, the guaranteed price for 1931 was set at \$5.50 per ton, in line with similar contracts in the U.S.A.

This contract was accepted by the Beet Growers' Association and under it approximately 12,600 acres of beets were planted.

Spring conditions, however, were not so favorable as in 1930 resulting in considerable lost acreage, and some very thin stands of beets. Particularly was this true in the southern or factory district, which fell behind other localities in tonnage harvested.

The light rainfall of the summer made frequent irrigations of beets a necessity and the value of irrigation for sugar beets was fully demonstrated.

An extremely general use on a field scale of commercial fertilizer, mostly Trail Super Phosphate, applied to over 8,000 acres, produced the expected results of increased tonnage, earlier ripening, and higher purity of the beets harvested.

The final result has been a crop of better than average tonnage, and with the highest sugar content ever reached in Alberta, probably the highest in the American continent for 1931.

## BEES AND HONEY

Only a few years ago a honey bee was a novelty that most of our Alberta children had never seen. A few adventurous souls here and there kept a colony or two of bees and their neighbors were surprised that they really produced some honey, but all the honey on the grocers' shelves bore an eastern Canada or United States label, and the price was so high that it was one of the luxuries. Contrast that condition with the present year when we read of a farmer having a team of horses killed by bees, when Southern Alberta honey is used as a staple food in almost every home and when after supplying this heavy local demand the producers have had over twenty cars of honey to ship out of the district to other markets. This is just one of the many indications that we have definitely passed the days of our pioneering.

One natural advantage that local beekeepers have is that sweet clover and alfalfa honey, which forms the bulk of their production, is a mild white honey that is favored on most markets. This is a factor of extreme importance in times such as this when competition for markets of all commodities is so keen.

Unquestionably the full benefits have not been realized from the good quality of Southern Alberta honey because sufficient care has not been given to grading and the superiority of the product has not been brought forcefully to the attention of the dealer and consumer. It seems to be well worth while to give careful consideration to grading as it would be possible for most of our honey to come under the choice grades.

More attention could also be given to exhibiting at fairs where honey is featured. Lethbridge honey has already won premier honors at the Royal Winter Fair at Toronto and by a united effort it should be possible to select exhibits from our large volume of high quality honey that would be difficult to excel anywhere in the Dominion.

## POULTRY

The steady increase in poultry and egg production which has been in evidence for a number of years suffered a reverse in 1931, due to the general depression and particularly due to the low level of egg prices throughout the first three-quarters of the year. The drastic break in egg prices which occurred late in 1930 discouraged producers and led to a severe curtailment of restocking. This primarily affected the hatchery men, but secondarily, and of more importance, caused a decrease in egg producing stock. This decrease was further augmented by the greater than usual elimination of old stock during the early fall.

As already stated, egg prices were discouragingly low during the first three-quarters of the year, but they staged a spectacular comeback during the fall. However, as winter set in a change took place and egg prices apparently decided to participate in winter sports, got on the toboggan and never even paused until bottom was reached. The general feeling of optimism which had filled the poultrymen with the rise of egg prices suffered a serious shock and as the year ends with prices holding at rock bottom the producers anxiously question what the future has in store.

The only redeeming feature of the whole year has been the low feed prices which have minimized cost of production and even in some cases made a slight profit possible. This same factor has been a favorable element for the producers of dressed fowl and turkeys, the prices of which maintained a comparatively fair level throughout the year and particularly during periods of seasonal demand.

## LIVESTOCK

More livestock was handled from shipping points in Southern Alberta during 1931 than in any recent year, as the following comparative shipments for the Lethbridge railway division will show:

	1928	1929	1930	1931
Horses .....	9,022	10,703	8,278	5,859
Cattle .....	46,138	42,690	41,430	41,783
Sheep .....	83,223	95,086	91,854	109,167
Hogs .....	56,475	67,512	76,333	72,015

Total .....	194,868	205,991	217,895	228,824
-------------	---------	---------	---------	---------

While the railway movement of livestock in Southern Alberta as a whole was only slightly larger than the previous year, 1931 brought a gratifying increase in livestock handlings through the Lethbridge stockyards.

During 1931 livestock prices declined to a new low level, though the volume of the total 1931 livestock crop has been greater than that of 1930. It is hoped that 1932 will see some improvement in livestock prices, as should present prices continue, it will seriously affect our livestock industry.

During the past year a new stockyard was constructed at Lethbridge by the Canadian Pacific Railway Co. and livestock shippers were favored with a service which is much appreciated. The new yard, while not any too large for the fall run, is up-to-date in every way, and the management has done everything possible to give a service equal to that of any other stockyard in Canada. This has encouraged more stock to the yard and we may look for a steady increase in the coming year.

During the year there was a steady drop in hog prices. Opening in January at \$8.25 for bacons, prices declined until in December bacons were selling at \$3.35.

Lamb prices have been low during the year. The year opened with choice lambs selling around 7 cents and fat ewes at 4 to 4½ cents. After a heavy February-March run of finished lambs which sold from \$5.75 to \$6.25, prices firmed to as high as 8 cents in April. New lambs appearing on the market in late April and early May brought as high as 11 cents for a comparatively small number, but in July a decline in prices set in and during the fall months choice lambs dropped as low as \$4.25 to \$4.50, with feeders at \$3.50 and ewes and yearlings going as low as \$2.50 to \$3.00.

Despite low prices the sheep population of Southern Alberta is being well maintained, and as prices again begin a general upward climb it is to be expected that sheep husbandry in this part of the province will increase. Farm flocks of sheep are growing generally in popularity as their value in creating a profit out of weeds and waste becomes better known.

Southern Alberta has furnished Canada with an interesting experiment in fitting fat cattle for market. As a result of co-operation between range cattlemen, irrigation farmers and sales agencies, the Red Label Beef Association has been formed and the provincial government has placed an inspector in charge at Lethbridge to instruct farmers how best to fit cattle for the market. Baby beef has been featured by the association, and many of the finished cattle have been shipped to Old Country markets where they sold alongside the best Scottish on practically even terms. Beef cattle prices opened in January at 6 to 6½ cents, dropped to 5 to 5¼ in the spring, and then the Old Country market was tapped, with the result that, after paying all expenses, cattle shipped overseas returned a premium as high as one to one and one-half cents a pound over Alberta prices. In August, however, this premium disappeared, and prices dropped as low as 4 to 4½ cents on a Lethbridge basis. A fairly heavy run of stocker cattle occurred during the fall months, with prices opening around 4 cents and dropping to 3½ cents for the balance of the season.

## OIL AND GAS

Although the general depression in business and finance has affected the oil and gas industry in Southern Alberta during the past year progress has been made and the outlook is encouraging. Production in the Red Coulee field south of Lethbridge, near the border, has continued consistently.

Little new development in the Red Coulee field took place during the year operators having been forced to curtail drilling. A return of better times will doubtless see additional development of this field. Other areas, however, have had a play with highly satisfactory results for the most part.

The Keho Lake field, 18 miles northwest of Lethbridge, is the centre of drilling for the Hudson's Bay Oil and Gas Company, Continental Oil being interested with the Hudson's Bay company in this venture. Their No. 1 well got oil both in the Benton and at the Ellis-Madison contact, the crude being a light crude of excellent quality and accompanied by considerable gas. A fishing job has held up the drilling-in of this important well, hence it is impossible to state just what the well will make when given a test. However, it looks like a

commercial pumper as it stands, and doubtless warrants additional development. The main volume of oil was found at 4,925 feet.

Another strike of major importance and in the same horizon was made in the Twin River field at the Parco No. 1 well, L.S.D. 16, Section 34-1-20-W4, between the north and south fork of the Montana border and some 20 miles northwestly from the Red Coulee field. At 3,880 a showing of high grade crude oil was encountered with probably a million feet of gas. The oil rose 1,300 feet in the casing and later filled the hole. The well, financed by the Parco Oil Company, Canadian subsidiary of Prairie Oil and Gas and Producers and Refiners Corporation, was drilled on a Nordon Corporation lease, that company holding some 13,000 acres on the structure. In carrying the hole deeper into the lime the water line was pierced and the well was invaded by water. The well is now bridged back to the upper Madison horizon that yielded oil and production will be taken from that level. The oil tested 31.5 gravity beaume and is of light brown color. The strike will probably lead to additional development this year.

Gas development has pretty much centered in the re-pressuring of old wells in the Bow Island field by the Canadian Western Natural Gas Company. Up to December 1st there had been stored in the old Bow Island wells  $2\frac{1}{2}$  billion cubic feet of gas. This gas is piped from Turner Valley. Under the conservation program in the province the southern gas wells have been shut-in during the year, all gas used coming from Turner Valley where there is a large surplus which otherwise would be wasted.

During the year the provincial government, which now controls Alberta's natural resources, established a branch petroleum and natural gas office in Lethbridge in charge of a qualified petroleum and natural gas engineer. This service is much appreciated by the industry.

The refinery field was marked by the opening of the large, modern plant at Coutts of the Northwest Stellarene Company. The outlook for refiners in 1932 is considered favorable. The Maple Leaf Refinery at Coutts recently passed into the hands of strong Denver interests and is operating steadily with plans for expansion.

## MILLING INDUSTRY

During the past year the milling industry has enjoyed a nice steady business, the local mill having a capacity of approximately one thousand barrels of flour per day, has been running nearly steady. They ship their flour all over Alberta and Southern British Columbia, a great deal of their product going to Vancouver.

The export business has not been as good as 1930 due to the United Kingdom going off the gold standard and the drop in the pound sterling. The local mill cannot compete with cheaper wheat from other parts of the world.

The local mill has tried to keep up-to-date. Within the past year they have just completed an up-to-date concrete elevator of 65,000 bushels capacity. This is used as a storage and cleaning plant for the company's twenty country elevators. They have also installed an up-to-date laboratory at a cost of approximately \$10,000, and fully equipped with the latest devices for testing purposes. This laboratory is in charge of Mr. S. T. Hadley, a graduate chemist from the University of Manitoba, and is a great aid to scientific milling as

all wheat is analyzed before it is milled which insures the unity of flour both in protein and texture.

Besides the manufacture of flour the company specializes in poultry feeds. They manufacture all their own chicken mashes, developers, and laying mashes, using a new product of their own known as Pure Wheat Germ which carries a protein content of about 28% which is nearly twice as high in protein as ordinary feeds, and as the poultry business is developing in the Lethbridge district they find a ready sale for their products.

The alfalfa meal mill which is owned and operated by Geo. W. Green & Company, Limited, and started here about two years ago had a very bad fire in the early part of the year, but as the owners were encouraged by past business, a new plant was installed, being one of the most up-to-date and largest alfalfa meal plants in Western Canada. Their product consists of alfalfa meal of different brands, besides a very fine quality product known as Leaf Meal. They also manufacture sweet feeds manufactured from alfalfa meal and molasses. They find a very ready market for all their products which has increased about 100% within the last year and is in big demand by all stock feeders.

### WHOLESALE TRADE

Lethbridge and district is well equipped with wholesale and jobbing houses, entitling it to be classed as the chief supply centre for Southern Alberta. Practically all branches of wholesale supply houses are in active operation in Lethbridge, handling the distribution of the chief lines of commodities. First-class warehouses, factories and equipments assure the community of the best of service in every department, including wholesale groceries, fruits and vegetables, tobaccos, confectionery, biscuits, hardware, lumber, automobile supplies, boots and shoes, rubbers and practically every item of mercantile importance.

As far as possible the wholesalers endeavor to support Alberta industry by supplying such lines as honey, biscuits, confectionery and vegetables.

Coincident with the general decline in the price of commodities, goods have been marketed at the lowest figure for many years. In practically all cases staple lines are at or below pre-war level. The recent changes in tariffs, accentuated by the high rate of exchange has curtailed the importation of many lines from the United States, but these have been adequately replaced by quality merchandise to be purchased on reasonable basis from the other parts of the empire, Great Britain, Australia and South Africa. The demand for these goods is increasing and has been fostered mainly through the activities of various trades representatives who have come to Lethbridge to introduce them.

### ALBERTA MOTOR ASSOCIATION

The excellent relations and co-operation of past years between this association, the Lethbridge Board of Trade and the Associated Boards of Trade of Southern Alberta have increased during the year just closed and as a result continued progress in the interests of association members and motorists generally has been accomplished.

In accord with all business enterprises this association has found the year 1931 a year in which the prevailing economic conditions have had to be met and overcome and only by the untiring efforts of the officers and the splendid support of motorists were the directors permitted to carry on and show progress.

In June the association moved to larger and more commodious quarters located in the Marquis hotel annex. The new office is entirely devoted to the disbursing of the association's stock in trade consisting of maps, travel information, road reports and in fact any service promoting the comfort, safety and welfare of the member. Since becoming established in the new quarters the appreciation of the association's services has been increasingly exemplified through the greatly increased demand by the motorists of this southern division for information and assistance and by the increased support through motorists taking memberships.

The local board of directors continue to meet regularly and the entire directorate of the branch meet periodically. Very considerable success has attended the deliberations of the board during the year and the directors have the gratification of the members particularly and motorists in general for the advancement accomplished in the interests of car owners.

The board of directors particularly wish to express their appreciation of the splendid co-operation received from the city council and city manager, the Alberta Provincial Police and the public works department. The provincial directors from this branch have consulted with officers from the above departments and have always received due consideration of their proposals and in many cases direct and immediate action.

Some progress has been made in connection with increased directional signs on the main highways and danger signs have been erected at many needed points. Much progress has been attained in connection with highway improvement.

## HIGHWAYS AND TOURIST TRAFFIC

The closing of the construction season of 1931 brings about the completion of practically all the 1931 road program as far as the provincial government public works department is concerned and with the adverse general conditions existing and the anticipated cut in appropriations very little additional new road work can be anticipated for 1932 in the Lethbridge district.

**RED TRAIL**—It is hopeful that the gap in the Red Trail between Taber and Medicine Hat will be gravelled. This portion of 80 miles between Taber and Medicine Hat has been graded and the route improved greatly by the elimination of several turns, corners and grade level railway crossings and the road made ready to receive the gravel. It is a very important inter-provincial highway and it is imperative that earnest consideration be given that the work be completed as early as possible for the 1932 traffic.

**YELLOW TRAIL**—We are pleased to record that the Yellow Trail between Lethbridge and Cardston via Magrath was completed during the fall of 1931 and this now makes a splendid gravelled secondary highway serving a large local and tourist traffic.

**SUNSHINE TRAIL**—Extending from Coutts to High River via Lethbridge. This work is all completed and the highway gravelled and enjoying a large portion of the tourist traffic between

Montana and our national parks. On August 10 the Sunshine Trail convention was held at Waterton Lakes National Park. A large attendance of delegates from Montana and Idaho were present in addition to delegates from Edmonton, Calgary and Lethbridge. This was a very interesting and constructive convention and now that the objects of the association as far as Sunshine Trail in Alberta is concerned have been attained it was decided to extend the activities of the association to the improvement of other highways. It was resolved that the association petition both the American federal government and the Canadian federal government to combine Waterton Lakes National Park and Glacier National Park into an International Peace Park. The next annual convention of the Sunshine Trail Association will be held in August 1932, at Glacier Park hotel.

**WATERTON LAKES NATIONAL PARK**—This popular resort showed marked improvement during the past season. Considerable work was done by the park authorities in cleaning up the park generally and improving the highways within the park. It is with considerable pleasure that we are able to report wonderful progress in the road work particularly on the Akamina highway. Under the relief program the federal government under the efficient supervision of Mr. Knight has accomplished considerable heavy road and rock work. This highway is a connecting link between Waterton National Park and the west side entrance to Glacier National Park. Appropriations have been made by the American government to build a highway up the west side of Glacier National Park to connect with the Akamina highway in Waterton Lakes National Park and this work on the American side will be undertaken immediately satisfactory arrangement can be made with our federal government and the British Columbia government for the completion of their work. The major and most costly portion of our work is completed but present appropriations will only carry same along to the end of February, 1932. It is to be hoped that another small grant will be made to complete this work and it is earnestly urged upon the government of British Columbia to make appropriations to continue the work through a corner of that province which will only require about 15 miles of inexpensive road work through a flat country. This gap will connect up and afford a most scenic highway connecting Waterton Lakes National Park with the Roosevelt Trans-Continental highway in Glacier National Park. It is much to be desired to further stimulate tourist traffic.

The tourist camp at beautiful Henderson Lake took care of almost one hundred more cars than during the previous year which tends to establish the popularity of this comfortable stop-over when it is recalled that tourist traffic for the past year was somewhat less than in 1930 when the camp handled some 895 cars. Additional improvements have been made to the camp grounds and more facilities for tourists' accommodation are available.

The provincial government department of public works undertook to keep the Red Trail through the Crow's Nest Pass and the Yellow Trail from Lethbridge to Cardston, also the Blue Trail from Macleod to Calgary free from snow and open for all winter traffic. It has been a source of great convenience to the travelling public. The department has been somewhat handicapped owing to lack of appropriations for this work and shortage of snow fighting

equipment but are deserving of great credit for their efforts under trying circumstances. It is to be hoped that before another winter they will be in a position to keep their highways free from snow particularly the Sunshine Trail from Coutts to High River via Lethbridge.

### **LETHBRIDGE DISTRICT DEVELOPMENT ASSOCIATION**

The Lethbridge District Development Association was organized just about a year ago. The idea of this organization was to co-ordinate the farmers, business men, and present organizations to develop the potential possibilities of our irrigated lands.

We have not accomplished very much during this year on account of financial conditions, but we have not lost any opportunity in presenting the possibilities which we have in the irrigated districts. We have done everything possible during the year to secure another beet sugar factory, as we realize that the beet industry is really the foundation of the many things which it will bring in its train such as a milk condensery, large feeding grounds, and the possibility of a packing plant. Our present beet sugar factory had the best run and will possibly make more money this year than in any since it was started, even with the low price of sugar. The explanation of this is the large percentage of sugar content of our beets being 18.34 per cent. mill run which is the highest percentage of any beets grown on the North American Continent.

## **Civic Administration**

### **CIVIC OFFICIALS**

Mayor—Robert Barrowman

Manager—J. T. Watson

Aldermen—Dr. W. S. Galbraith, D. H. Elton, K.C., W. L. McKenzie, K. D. Johnson, A. Smeaton, W. Ripley.
